Orpheus

1 What it **is**

Database of academic journals and their:

- Revenue model (Hybrid / Open Access)
- Article processing charges
- Self-archiving policy
- Europe PMC participation
- Contacts for queries
- and more…

2 What it **does**

- Aggregates information from:
  - Publishers
  - Databases (DOAJ, RoMEO, PMC)
- Stores data in a machine-readable format
- Has a RESTful API for easy integrations
- Keeps a history of superseded policies and attributes

Find out more:

3 What it **looks like** for

Developers

- Written in **Python (Django)**
- Documentation available
- **Open Source** (GPL 3.0)

4 Use it to **empower** your team

We have integrated Orpheus with our **helpdesk** and **deposit systems** to support our team members:

- Making decisions on whether or not to fund Open Access charges
- Advising researchers on complying with funders' requirements
- Deciding what version of an output can be deposited

Helpdesk

ON-HOLD Ticket #362343 — Apps

Update on metadata received from Symplectic.

Sarah Polonius-Teichmann May 09 03:31

Open Access enquiry SE-1018303 has been received.

Link to publication in Symplectic: https://elements.admin.cam.ac.uk/viewobject.html?cid=1&id=1018303

The information received was as follows:

department: Cambridge, Cambridge::Department of Physics, Cambridge::Department of Physics::Theory of Condensed Matter
Publishing information:

Article title: Unbiased classification of mosquito blood cells by single-cell genomics and high-content imaging.
Journal title: Proceedings of the National Academy of Sciences of the United States of America
Publication date: 2018-08-31
Online publication date: (none provided)
Funders: (none provided)
Acceptance date: (none provided)

Manuscript version(s):
