SKE 185 ◇ If the pN word was trisyllabic (***paīUQü**), the loss of ***-Qü** in pU (or pFU) may be accounted for by the adaptation of the word to the reg. U √ pattern (if the U √ is inherited or borrowed). But if A ***p|baltu** 'axe' belongs here (rather than to N ***paī∇_lṽ** 'to split; axe' [q.v.]), the pN etymon in question is to be reconstructed as ***paīU(-Qü)**. Several scholars have treated this lexeme as a Wanderwort and have tried to explain its occurrence in many lgs. by borrowing (Krtm. E 105f., Dr. TM II #710, KW 31, Rm. SKE 185, Pp. AKAS, Mng. ZAL 300ff., etc.). Their hyp. is only

partially correct. The long-hold hyp. about the Mesopotamian (Ak and Sum) origin of IE *peleku- 'axe' had to be rejected when it was found that Ak pilakku meant 'spindle' rather than 'hammer', and Sum balag meant 'ein paukenartiges Musikinstrument' (see Wüst IAB). In fact, the spread of the word throughout vast regions of Eurasia is due to both inheritance and borrowing.

'press', Δ *načć-* id., Tm *naci* v. 'bruise'). This probability of coalescence is increased due to the sincretism of the initial sonorants in D: N **n-*, **ń-*, **l-*, **ł-*, and **r-* coalesced in D **n-* ◇ The position of FU **răc̣*∇ and D **nač-* is ambiguous: they may be alternatively equated with S **√r̥ss* 'break into pieces' and allow the rec. of a N etymon **răc̣*∇. On the other hand, S **√r̥šš* may be equated with M **nič̣a* 'asunder, into small pieces', which will lead to a N **rič̣a*. This ambiguity is due to the instability of vowels in S verbs and to the neutralization of oppositions between several affricates in U and D. See N **rič̣*∇ 'small pieces; to crush'.

One of possible meanings is 'together', which is compatible with its use as a marker of multiple subjects and multiple objects in K ◇ IS's hyp. of the exclusive connection of {IS} *-t∇ with inanimate nouns is not sufficiently proved; its only argument is S *-āt- as marker of pl. of non-active nouns, which is not a valid proof: in fact S *-āt- is a compound: *-ā- as a marker of collectivity (used without *-t- in the pred. case of f.) + *-t- as a nominalizer (allowing to use the construction N [nominal] + *-ā- in specifically nominal cases with case endings [*-u of nominative, *-a of accus.-genitive] and with the deterner *-m). The resulting form N-āt-um nom. / N-āt-am acc.-gen. is not actually a pl., it has the case-and-status endings of sg. and is constructed with predicate verbs in f. sg., because in pS it was a n. coll. (sg. f.). The morpheme *-t- in S *-ā-t-u(m)/*-ā-t-a(m) goes back to the N prn. of inanimate objects *t̄ä (q.v. ffd.) and hence does not belong to this etymon ◇ ≈ IS I 12 (*-t∇ as marker of pl. of inanimate nouns), Sin. There is syntactic and morphological ev. that proves that in pS the forms with *-ā-t- were not real plurals, but collective nouns (in sg.): [a] the *-ā-t-forms have case endings of sg. (nom. *-u, accus.-gen. *-a) and a marker of status determinatus of sg. (*-m), [b] if they function as a subject, their predicate (in Arabic) is sg. f. Here the S morpheme *-t- is actually a nominalizer (substantivizer) of an originally analytical construction of collectivity (with collectivity pc. *-ā < N ?σ * $\text{ʔa}^{\text{h}}\text{a}$ [collective pc. of inanimate, '≈ de ça']). This is suggested by the fact that S *-ā-t- is found only in the purely substantive cases (nom., accus., gen.), while in the pred. case (> f. pl. of the WS new perfect) we find S *-ā without *-t-. The same *-t- is found as a substantivizer of Ak adjectives in pl. This opposition is preserved in IE (*sO 'he' [active gender] ↔ *toT 'it' [non-active gender]), partially in FU (F hän and Lp N {N} s̄q̄n [both from N *sE] are used for human beings ['he\she'], while the t-pronouns are used indiscriminately), in D (Krx -s m. ↔ -d ntr. and f. [merger of homonymous markers] in pronouns, F Hahn KG 23-6), and probably in Eg (-f [< *s̄w-] m. ↔ -t f. [sc. "female-and-inanimate" gender]). In some daughter families N *t̑ä was opposed to the N animate *yi 'he' (e. g., S *y- 3m [< N *yi 'he'] ↔ *t- 3f) or to other dem. pronouns (that either were connected to animate beings or were originally neutral as to the opposition 'active' ↔ 'non-active'): C *k- m. (< N animate [?] dem. prn. *k̑'ü') ↔ *t- f., Sm: in Ne T the pronouns ТЮКУ and ТИКЫ (anaphoric) are used anaphorically when referring to non-humans only, while for human beings the prn. of 3s пыда 'he\she' (a Ne innovation) is used (Ter. OGNJ 148) | [2] The N prn. *t̑ä as denoting a single object is opposed to the N prn. of collectivity\plurality *n̄'ä' (q.v.). The opposition is preserved (a) in U (e.g. F t̄ämä 'this' ↔ n̄ämä pl. (Gard. 85); in Eg O (acc. to Ed. 83-9, EG 216, 251) n̄w, nf, etc. were not pl. forms, but abstract pronouns: n̄w 'Dieses, Dieses da', nf 'Jenes', probably from collective pronouns: p̄w 'this' m. ↔ t̄w f. ↔ n̄w abstract < *coll.), (c) in IE ("primary" verbal endings: *-ti 3s ↔ *-nti 3p, "secondary" endings: *-t 3s ↔ *-nt 3p), while in Eg fMK n̄w, nn, and nf had (preserved?) the

function of pl.; this situation may go back to an ancient difference between dialects of Eg, so that one cannot rule out the very old age of this n-pl. of pronominal (which may be even inherited from pN) (cp. the dual marker *-ni in S, -n of du. in Tz {Stm.} mārāw-i-n 'twenty', and other traces of the N pronoun of duality *nE 'they [two]' [in U, K, and A, see s.v. *nE]) | [3] A new opposition of N *t̥ä demonstrative vs. N *K̥o interrogative has developed in some lgs., in which both N *K̥o 'who?' and N *t̥ä lost the semantic feature of animateness (in N *K̥o) and inanimateness (in N *t̥ä), and both were generalized as interr. resp. dem. pronominal stems: L quantum ↔ tantum, NHG was ↔ das, wer ↔ der, NE where ↔ there, when ↔ then, R куда ↔ туда, когда ↔ тогда, как ↔ так, какой ↔ такой, Y T qada 'where?' ↔ tada 'there', probably also in WrM kedū(n) 'how much?' ↔ tedūi 'so much' ◇ The sx. of the theme-focalizing case (≈ marked nominative) *-re in A *te-r▽ (preserving this function up to the attested M lgs.) is akin to the IE nominative-accusative ending *-r in heteroclitic nouns and is to be projected up to the pN level (F N *r▽ - theme-focalizing [topicalizing] pc.) ◇ IS I 7 (IE, HS, K, U, A, D), Gr.
