

# First Activity

Learning in Different Settings

# Learning in Different Settings

- Identify a situation in which you were a ‘learner’ but **not** in a formal, academic setting.
- What was learned? How did you know?
- What were the barriers to learning? Were these overcome? How?
- What role did others play in your learning?

# Second Activity

Learning Practices

# Learning Practices

- Are there specific practices which you have found help your learning?
- Are there specific practices which you know of or have tried, but which you have found do not help your learning?

Are these specific to certain contexts?

# Supplementary Question

- When, where, and how did you learn these practices?
  - Formal Education?
  - Informal Settings?
  - Trial and Error?
  - Books, Videos ...?
