Supplementary Figure 1. Comparison of mean minutes spent (A) swimming and (B) cycling per season using different approaches to missing data handling.

- only those participants with no missing days (N=313),
- all participants with at least 2 days non-missing (N=591) with missing values treated as missing (i.e. if numeric values were recorded on two days, these values were summed and divided by 2), and
- all participants with at least 2 days non-missing (N=591) with missing values coded to 0 (i.e. if numeric values were recorded on two days, these values were summed and divided by 7).
