5 cm deep layer taken off top
- dark brown soil + chalk flecks
- quite crumbly
- evidence of chalk underneath

Below this layer
- dark brown, v. clay-like soil
- small charcoal pieces
- coming down onto chalk

Thick clay changes to crumbly soil/small chalk pieces. Still thick clay around the large stones on one side

- clay
- \( \times \) crumbly mortarish, chalky

Base slopes up to meet edges.
