Early Career Researcher: Biology

**Audience:**
- Have been through the PhD process
- Making a career out of research
- Will be in their first academic job

**Knowledge:**
- Should have a basic understanding of the concepts of data and organisation
- Need to gain more specialist knowledge for their discipline

**Session running time:**
- One 3 hour session
- Run as part of the induction process for new research staff

**Things to think about:**
- This audience will have some experience of doing a research project
- They are open to exploring new tools for managing their work and their data
Third Year Undergraduates: History

Audience:
• About to start their dissertation research
• Have been used to taught sessions not independent study

Knowledge:
• Will be unfamiliar with the research process
• Will understand the concept of reference management but not creating/storing their own data

Session running time:
• One 2 hour session
• Run at the start of their final year as part of general dissertation preparation classes

Things to think about:
• This audience have never attempted a solo research project before
• They may not think they deal with data
• They are only interested in academic success
First Year PhD Students: Chemistry

**Audience:**
- Beginning their first large scale formal research project
- Their biggest need is establishing effective data storage methods

**Knowledge:**
- Have some experience with the research process but on a smaller scale
- They have a little about new online methods of working on their research but are keen to know more

**Session running time:**
- One 2 1/2 hour session
- A compulsory session given to a large group of students

**Things to think about:**
- These students will be supported by funders so will have to share their results and data via a repository
Final Year PhD Students: Psychology

**Audience:**
- Will have already gathered and analysed their data
- Will be very busy trying to put all of their work together and thinking about the next stage of their work

**Knowledge:**
- Should have a solid knowledge of managing the information they gather and create
- May have an awareness of the importance of sharing their data but not in-depth knowledge

**Session running time:**
- A series of sessions totalling 3 hours to be held across the first few weeks of term
- Attendance at all sessions in **not** compulsory

**Things to think about:**
- They may be dealing with sensitive personal information from research subjects
- They will be looking to publish their work, both through a repository and more formally
