Physical Capability is Associated with Mortality in Mid- & Late-Life:
Results from a British Cohort Study

Hazard Ratio

Grip Strength*

Pinteraction = 0.83#

Timed Chair Stand Speed*

Pinteraction = 0.11#

Usual Walking Speed*

Pinteraction = 0.85#

Standing Balance*

Pinteraction = 0.44#

- Age & sex adjusted
- #age group x physical capability measure

48-69 years old
70-92 years old
