In its current state, the manuscript is clearly not expected to complete the text from memory. In verses 2 and 3 the scribe has represented each of the latter words of the verse using only their first one or two letters. In verse 1, the abbreviation of the word in the line suggests that the scribe was just using the first letters of the word. The more extreme method is simply to omit as much of the end of the verse as is required. Both these methods can be seen at work in this fragment, in the very last verse of the Psalter.
