The publishing process relies on the work of volunteer reviewers, and evaluating the interdisciplinary papers published in G-Cubed can be challenging. As Editors and Associated Editors, we would like to give our appreciation to all reviewers and would like to acknowledge them in this editorial. G-Cubed published 322 manuscripts out of 577 submissions in 2021, thanks to the efforts of 912 dedicated reviewers. Their names are listed below, and in *italics* are those who provided three or more reviews. A big thank you from the G-Cubed team!
