

Description of Additional Supplementary Files

File name: Supplementary Data 1:

Description: Raw data file of fish distance estimates prior to calculations to convert pixels into distance estimates in metres, and calculation of movement speed.

File name: Supplementary Data 2:

Description: Distance estimates and movement speeds calculated from the raw pixel data.

File name: Supplementary Data 3:

Description: Calculations performed on the raw pixel distance estimation data to obtain distance estimates in metres, and movement speeds for each trial.
